WORK EXPERIENCE

Software Engineer

July 2025 – Present

Mercor

San Francisco, CA

- Built high-quality training data pipelines for frontier AI labs to enhance model reasoning and coding capabilities.
- Served as Technical Auditor, reviewing contractor-submitted data and approving \$47,200 in performance bonuses.
- Created automated scripts to evaluate and score training data submissions, streamlining the auditing workflow.

Founder & Lead Engineer

April 2025 – May 2026

CoChat.io

San Francisco, CA

- Pioneered personality-as-infrastructure system, allowing developers to deploy AI agents with unique personas.
- Led a team of 3 across engineering, marketing, and sales, driving product vision and development from 0 to 1.
- Launched the core MVP to a closed beta of 15 early adopters, establishing a rapid user-feedback loop.
- Prototyped new product features within hours using agentic AI workflows, cutting iteration cycles from days to hours.

Software Engineer Intern

June 2023 – September 2023

Ricoh USA, Inc.

Duluth, GA

- Built scalable AWS Lambda microservices in Python, automating the processing of 150M+ USPS data points.
- Engineered an automated MySQL validation pipeline for 29 distinct database schemas with technical documentation.
- Guaranteed 100% data integrity by integrating schema-consistency checks into the Azure DevOps workflow.

Software Engineer

March 2020 – September 2022

Tribot LLC

San Francisco, CA

- Achieved a #2 Global Ranking against 200,000 daily active users by engineering a synchronized, multi-agent bot architecture communicating in real-time via WebSockets.
- Defeated proprietary AI classification models by engineering adversarial agents that simulated human behavior.
- Leveraged Java Reflection and memory analysis to extract and process real-time environmental telemetry.

PROJECTS

SwipeLeft | TypeScript, Cloudflare

swipeleft.pages.dev

- Shipped a photo library management tool to the Apple App Store, successfully monetizing the app to \$15 MRR.

Games Ad Free | TypeScript, Cloudflare

GamesAdFree.com

- Bootstrapped a gaming platform to 4,600+ monthly unique visitors with Cloudflare and zero marketing spend.

Polymarket Automated Trading System | AWS, TypeScript

- Built a sub-1ms signal detection on Coinbase feeds, executing trades on Polymarket market with on-chain settlement.
- Identified statistical edge ($p = 0.003$) across 1,700+ trades using hypothesis testing and a self-tuning optimizer.

TECHNICAL SKILLS

Languages: TypeScript, Python, SQL

Tools: Claude Code, AWS, Cloudflare, Supabase

EDUCATION

California Polytechnic State University, San Luis Obispo

September 2022 – June 2024

Bachelor of Science, Computer Science

City College of San Francisco

August 2019 – May 2022

Associate of Science, Computer Science, Engineering, Data Science, Science and Math
